

Backend / Game Services — API Contract (Short)

Service: Global Visits Counter

Description: Counts the total number of game launches.

Endpoint

URL	Method	Description
/	GET	Increments the counter by 1 and returns the current total

Request Example:

```
GET https://your-visits.onrender.com/
```

Response Example (200 OK):

```
{ "total_visits": 21 }
```

Status Codes

Code	Meaning
200	Success
400	Bad Request
401	Unauthorized (not used)
403	Forbidden (not used)
500	Server Error

Data storage: On the backend in a file (`visits.txt`). GameMaker only requests and displays the value.

HTTP Method: GET — instructs the server to increment and return the counter
